Contents

VOLUME 35 NUMBER 1

Presidential Address

2 *E. Lester.* Objectives and perspectives in plant disease control

Letter to the editor

15 *I. R. Crute.* Investigations of gene-for-gene relationships: the need for genetic analyses of both host and parasite

18 *A. R. Stone, J. M. Holliday, P. L. Mathias and D. M. Parrott.* A selective survey of potato cyst-nemotode pathotypes in Great Britain

25 *J. G. Elphinstone and M. C. M. Pérombelon.* Contamination of potatoes by *Erwinia carotovora* during grading

34 *Melda L. Moffett, A. C. Hayward and P. C. Fahy.* Five new hosts of *Pseudomonas andropogonis* occurring in eastern Australia: host range and characterization of isolates

44 *L. G. Lim and R. E. Gaunt.* The effect of powdery mildew (*Erysiphe graminis* f. sp. *hordei*) and leaf rust (*Puccinia hordei*) on spring barley in New Zealand. I. Epidemic development, green leaf area and yield

54 *L. G. Lim and R. E. Gaunt.* The effect of powdery mildew (*Erysiphe graminis* f. sp. *hordei*) and leaf rust (*Puccinia hordei*) on spring barley in New Zealand. II. Apical development and yield potential

61 *D. J. Ballinger and J. F. Kollmorgen.* Glasshouse and field evaluation of benomyl and triadimefon applied at seeding to control take-all in wheat

67 *D. J. Ballinger and J. F. Kollmorgen.* Control of take-all of wheat in the field with benzimidazole and triazole fungicides applied at seeding

74 *M. W. Deall and J. S. Cole.* A comparative study of the pathogenicity and epidemiology of strains of *Pseudomonas syringae* pv. *tabaci* that cause wildfire and angular leaf spot diseases of tobacco in Zimbabwe

82 *Aurora Fraile, Angela Alonso and E. M. Sagasta.* Some characteristics of *Botrytis cinerea* isolates tolerant to procymidone

86 *S. A. M. Omar, K. W. Bailiss and G. P. Chapman.* Virus-induced changes in the response of faba bean to infection by *Botrytis*

93 *T. W. Hollins, P.R. Scott and R. S. Gregory.* The relative resistance of wheat, rye and triticale to take-all caused by *Gaeumannomyces graminis*

101 *G. R. Dixon and D. L. Robinson.* The susceptibility of *Brassica oleracea* cultivars to *Plasmodiophora brassicae* (clubroot)

108 *A. C. Newton, R. Johnson and C. E. Caten.* Attempted somatic hybridization of *Puccinia striiformis* f. sp. *tritici* and *P. striiformis* f. sp. *hordei*

114 *Constance M. E. Garrett.* Influence of rootstock on the susceptibility of sweet cherry scions to bacterial canker, caused by *Pseudomonas syringae* pvs *morsprunorum* and *syringae*

120 *M. R. Thomas and R. C. Shattock.* Effects of fungicides on *Drechslera* spp. and leaf surface filamentous saprophytic fungi on *Lolium perenne*

New or unusual records

126 *G. A. Hide. Phoma* and *Fusarium* rots on imported 'new' potatoes

128 *D. J. Hooper and Janet A. Cowland.* Fungal hosts for the chrysanthemum nematode, *Aphelenchoides ritzemabosi*

130 Book reviews

133 Corrigendum

VOLUME 35 NUMBER 2

Obituary

134 Philip Herries Gregory

135 *A. E. Osbourn, P. R. Scott and C. E. Caten.* The effects of host passaging on the adaptation of *Septoria nodorum* to wheat or barley

146 *Y. Ben-Yephet, S. Bitton and A. Greenberger.* Control of lettuce drop disease, caused by *Sclerotinia sclerotiorum*, with metham-sodium soil treatment and foliar application of benomyl

152 *N. Katis, J. M. Carpenter and R. W. Gibson.* Interference between potyviruses during aphid transmission

158 *John A. Barrett.* Testing for heterothallism and mating-type in plant pathogenic fungi

162 *K. W. Bailiss and L. A. A. Ollennu.* Effect of alfalfa mosaic virus isolates on forage yield of lucerne (*Medicago sativa*) in Britain

169 *J. N. Robinson and J. A. Callow.* Multiplication and spread of pathovars of *Xanthomonas campestris* in host and non-host plants

178 *A. Rosner, B. Raccah, M. L. Mayoral, M. Bar-Joseph and I. Ginzburg.* Synthesis of DNA complementary to the polyadenylated genomic RNA of potato virus Y and its molecular cloning

185 *M. S. Phillips and J. W. McNicol.* The use of biplots as an aid to interpreting interactions between potato clones and populations of potato cyst nematodes

196 *V. M. Lumb, M. C. M. Pérombelon and D. Zutra.* Studies of a wilt disease of the potato plant in Israel caused by *Erwinia chrysanthemi*

203 *H. Melakeberhan, R. C. Brooke and J. M. Webster.* Relationship between physiological response of French beans of different age to *Meloidogyne incognita* and subsequent yield loss

214 *P. Darby, B. G. Lewis and P. Matthews.* Diversity of virulence within *Ascochyta pisi* and resistance in the genus *Pisum*

224 *F. M. Humpherson-Jones.* The occurrence of virulent pathotypes of *Leptosphaeria maculans* in brassica seed crops in England

232 *T. L. W. Carver.* Histology of infection by *Erysiphe graminis* f. sp. *hordei* in spring barley lines with various levels of partial resistance

241 *T. Locke and Linda Andrews.* Effects of fungicides on powdery mildew, tree growth and cropping of apple

249 *J. A. Hutcheon, J. Coyle, M. E. Holgate and R. J. W. Byrde.* Effects of fungicides on long-term cropping and fruit quality of apple

New or unusual records

254 *W. H. Ko, Judy Tomita and R. L. Short.* Two natural hosts of *Kretzschmaria clavus* in Hawaiian forests

256 Book reviews

VOLUME 35 NUMBER 3

Obituary

259 F. J. H. Moore

262 *P. R. Day.* Plant–parasite interaction: a genetical perspective

270 *R. C. Hignett, S. E. Zamze, S. M. Munro and A. R. W. Smith.* Inhibition by bacterial lipopolysaccharide of wilt induced by phytopathogenic bacteria in cut cherry shoots, and of cherry canker disease

277 *H. J. Rogers, K. W. Buck and C. M. Brasier.* Transmission of double-stranded RNA and a disease factor in *Ophiostoma ulmi*

288 *C. J. D'Arcy.* Enzyme-linked immunosorbent assays for study of serological relationships and detection of three luteoviruses

294 *M. W. Shaw.* Effects of temperature and leaf wetness on *Pyrenophora teres* growing on barley cv. Sonja

310 *E. Shabi, H. Koenraadt and T. Katan.* Further studies of the inheritance of benomyl resistance in *Venturia pirina* isolated from pear orchards in Israel

314 *R. T. Plumb, E. A. Lennon and R. A. Gutteridge.* The effects of infection by barley yellow mosaic virus on the yield and components of yield of barley

319 *W. H. Yeh and J. M. Bonman.* Assessment of partial resistance to *Pyricularia oryzae* in six rice cultivars

324 *R. I. B. Francki, C. C. Ryan, T. Hatta, J. Rohozinski and C. J. Grivell.* Serological detection of Fiji disease virus antigens in the planthopper *Perkinsiella saccharicida* and its inefficient ability to transmit the virus

329 *E. J. Cother and V. Dowling.* Bacteria associated with internal breakdown of onion bulbs and their possible role in disease expression

337 *E. L. Mansvelt and M. J. Hattingh.* Pear blossom blast in South Africa caused by *Pseudomonas syringae* pv. *syringae*

344 *D. M. Kennedy, J. M. Duncan, P. I. Dugard and P. H. Topham.* Virulence and aggressiveness of single-zoospore isolates of *Phytophthora fragariae*

355 *M. J. Jeger.* Asymptotic behaviour and threshold criteria in model plant disease epidemics

362 *J. R. Coley-Smith.* Interactions between *Sclerotium cepivorum* and cultivars of onion, leek, garlic and *Allium fistulosum*

370 *J. R. Coley-Smith.* A comparison of flavour and odour compounds of onion, leek, garlic and *Allium fistulosum* in relation to germination of sclerotia of *Sclerotium cepivorum*

377 *P. D. Hewett and E. Damgaci.* A new procedure to detect a low incidence of *Ustilago nuda* in seed barley

380 *R. W. H. Parry and J. A. Callow.* The dynamics of homologous and heterologous interactions between rice and strains of *Xanthomonas campestris*

390 *P. W. Wareing, Z.-N. Wang and J. R. Coley-Smith.* Fungal pathogens in rotted basal leaves of lettuce in Humberside and Lancashire with particular reference to *Rhizoctonia solani*

New or unusual records

396 *C. Hiruki.* A new yellows disease of *Baekea virgata* associated with mycoplasma-like organisms

400 *D. L. Davies, J. E. Stickels and A. N. Adams.* A single occurrence of apple proliferation disease in England

403 *S. J. Mitchell, G. J. Jellis and T. W. Cox. Sclerotinia sclerotiorum* on linseed

406 Book reviews

VOLUME 35 NUMBER 4

411 Dedication and Editorial

413 *E. Bruzzese and S. Hasan.* Infection of Australian and New Zealand *Rubus* subgenera *Dalibarda* and *Lampobatus* by the European blackberry rust fungus *Phragmidium violaceum*

417 *R. J. W. Byrde, J. A. Hutcheon, R. R. Williams, E. Billing and D. C. Gwynne.* Fireblight at Long Ashton: a case history, 1971–1983

427 *Z.-N. Wang, J.R. Coley-Smith and P. W. Wareing.* Dicarboximide resistance in *Botrytis cinerea* in protected lettuce

434 *S. A. Rudgard.* Witches' broom disease on cocoa in Rondonia, Brazil: basidiocarp production on detached brooms in the field

443 *R. Loughman and B. J. Deverall.* Infection of resistant and susceptible cultivars of wheat by *Pyrenophora tritici-repentis*

451 *F. J. B. Reifschneider, A. C. Café-Filho and A. M. Rego.* Factors affecting expression of resistance in pepper (*Capsicum annuum*) to blight caused by *Phytophthora capsici* in screening trials

457 *H. M. Alexander, A. P. Roelfs and G. Cobbs.* Effects of disease and plant competition on yield in monocultures and mixtures of two wheat cultivars

466 *D. J. Royle, M. W. Shaw and R. J. Cook.* Patterns of development of *Septoria nodorum* and *S. tritici* in some winter wheat crops in Western Europe, 1981–83

477 *M. J. Jeger, D. J. Butt and A. A. J. Swait.* Components of resistance of apple to powdery mildew (*Podosphaera leucotricha*)

491 *D. J. Butt and M. J. Jeger.* Components of spore production in apple powdery mildew (*Podosphaera leucotricha*)

498 *M. J. Jeger and D. J. Butt.* Epidemics of apple powdery mildew (*Podosphaera leucotricha*) in a mixed cultivar orchard

506 *F. A. Hoare, T. Hunter and V. W. L. Jordan.* Influence of spray programmes on development of fungicide resistance in the eyespot pathogen of wheat, *Pseudocercosporella herpotrichoides*

512 *J. Webber, A. G. Mitchell and F. Smith.* Linkage of the genes determining mating type and fungicide tolerance in *Ophiostoma ulmi*

517 *S. E. Adams, R. A. C. Jones and R. H. A. Coutts.* Effect of temperature on potato virus X infection in potato cultivars carrying different combinations of hypersensitivity genes

527 *A. M. Stirling and J. A. G. Irwin.* Etiology of a newly described root rot of guar (*Cyamopsis tetragonoloba*) in Australia caused by *Phytophthora cryptogea*

535 *S. A. M. Omar, K. W. Bailiss, G. P. Chapman and J. W. Mansfield.* Effects of virus infection of faba bean on subsequent infection by *Uromyces viciae-fabae*

544 *Z.-N. Wang and J. R. Coley-Smith.* Studies on some characteristics of dicarboximide-resistant isolates of *Botrytis cinerea* from protected lettuce

551 *K. E. Hammond and B. G. Lewis.* The timing and sequence of events leading to stem canker disease in populations of *Brassica napus* var. *oleifera* in the field

565 *D. C. Harris and A. Bielenin.* Evaluation of selective media and bait methods for estimating *Phytophthora cactorum* in apple orchard soils

New or unusual records

575 *C. M. Port and C. T. Guile.* Outbreaks of flea beetles, *Altica* spp., on heather and other flowering plants

578 *P. H. Tantius, A. M. Fyfe, D. S. Shaw and R. C. Shattock.* Occurrence of the A2 mating type and self-fertile isolates of *Phytophthora infestans* in England and Wales

582 *A. Wainwright, M. A. Kenny and D. J. Yarham.* Increased susceptibility to *Septoria nodorum* in winter wheat infected by *Tilletia caries*

585 *C. M. Henry, R. A. C. Jones and R. H. A. Coutts.* Occurrence of a soil-borne virus of sugar beet in England

592 *D. L. R. Black and A. E. Brown. Microdochium bolleyi* associated with root rot of flax

595 *G. P. Martelli and A. Hamadi.* Occurrence of eggplant mottled dwarf virus in Algeria

598 Book reviews
